REASONS FOR ALLOWANCE

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

As per independent claim 1, the prior art does not teach air conditioner combination as a recited, and in particular the limitation whereby even when the temperature detected by the non-contact temperature sensor does not correspond to the actual temperature of the passenger compartment, the notifying means does not notify a passenger in the passenger compartment when the temperature of outside air detected by the outside air temperature sensor is lower than the predetermined air temperature and when the temperature of water detected by the water temperature sensor is lower than a predetermined water temperature.

As per independent claims 9 and 25, the prior art does not teach air conditioner/control process combinations as a recited, and in particular the limitation wherein the determining means/step determines whether the temperature detected by the non-contact temperature sensor corresponds to the actual temperature of the passenger compartment based on whether a state where the temperature detected by the non-contact temperature sensor is within a predetermined range for a predetermined time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
